ACCOUNTING & TAX

Not sure if you need the expensive 'Chinese Flower 1-2-3', or 'Spanish Numeral Four' spreadsheet programs? Then find out for only $20! "CheapCalc" will do double precision addition, subtraction, multiplication, division, power, SUM, and roots (using fractional powers). CheapCalc has many other functions too numerous to mention (just like the expensive spreads)! CheapCalc is available for all Heath/Zenith computers and operating systems. For more information, check out page 58 of the Software Catalog Update #1, or call HUG and order your copy today.
